## Summary

Full Stack JavaScript developer with background in finance and business analytics.

## Experience

### Freelance Webdeveloper

2016 - Present

Helped the work of several teams on the Credit Department as a junior analyst.

#### Projects

- MBF - Hybrid mobile app built with Ionic
  - Available on App store and Google Play (MBF Konferencia)

### Junior Credit Analyst, IBM Global Financing

2013 - 2014 (12 months) - Budapest, Hungary

Helped the work of several teams on the Credit Department as a junior analyst.

#### Accomplishments

- Individually analyzed companies based on financial and other information available, moreover reported on those credit rating and capacity.
- Mainly dealt with individual requests under 200k USD, but also participated in quarterly reviews of large public companies.
- In busy periods handled over 30 requests.
- In case of need picked up country specific analysis tools and helped out other teams too.

## Education

### Coding House

Full Stack JavaScript Development — 2016

Learned full (MEAN) stack javascript development during the 14 week program. Built fully-featured CRUD applications incorporating skills like web design, user management, social login, web and mobile app design, and cutting-edge frameworks like ReactJS and AngularJS.

Collaborated on larger projects with other members of Coding House, learned git and version control, practiced software engineering best practices and participated in hackathons.

## Oxford Brookes University

BA in Finance & Accounting — 2011-2015

Dissertation Title:

The potential of crowdfunding as a replacement for traditional tools of entrepreneurial finance.
